14-03-2007

The Director  
INCOIS,  
Hyderabad.

Dear Sir,

Greetings from Pondicherry Multipurpose Social Service Society!

PMSSS expresses its sincere thanks to INCOIS, the Director and the team of Scientists for the support towards the ICT program since October 2006.

The information such as wave height, the wind speed and wind direction, provided by INCOIS enables PMSSS to disseminate the same to the tsunami affected fishing communities in 20 target villages through PA systems and display boards along the coastal regions of Puducherry, Karaikal and Cuddalore. The INCOIS information benefits around 17940 families.

Further the INCOIS information is broadcast through All India Radio, Puducherry thrice a day, to reach out to the population of more than 50 lakhs listeners. The program is aired three times a day at 6.25 am, 12.05 pm and 7.25 pm at 1215khz, Medium Wave. The feedback from the people is quite encouraging.

The installation of PFZ digital board with inbuilt siren and microphone by INCOIS in the Fishing Harbour, Cuddalore OT is another milestone towards the Community Based Disaster Preparedness program of PMSSS.

The Consultation on Integration of Technology with Community Based Disaster Preparedness held at PMSSS on 21<sup>st</sup> Feb 2007 with the support of INCOIS strengthens PMSSS linkage to Science & Technology Institutions to broad base its future activities for the development of the fishing community along the coastal regions.

PMSSS on behalf of the fishing communities express its sincere appreciation and thanks to INCOIS for its valuable support and guidance.

Thanking you,

With regards,

Fr. R. Ratchagar  
Executive Director.
